	Allotments	Encourage Allotment Societies through the Council grant budget to encourage local residents to develop local food sources. Bring back into use redundant allotment plots	1. Discussions on plot maximising & tenants use of surplus products to be raised at Allotment Committee	11-Nov-19
	Neighbourhood Plan	The Neighbourhood Plan is presently in draft form and contains policies which recognise the impact that future development can have on the environment. The following policies have been initially suggested :		
		1. Housing Design -Policy RLS2 Applicants are encouraged to go beyond sustainable housing development standards, particularly with regard to environmental performance of buildings, resource consumption & recycling. Building for life, or an equivalent assessment framework, should be used to assess the suitability of proposals 2. Protect and enhance parks, other areas of green space and natural landscape of the Town. Policy RLS8 3. Green Infrastructure - Policy RLS10 Planning proposals should identify and green infrastructure affected; this should be protected and when necessary restored and enhanced. 4. Allotments - RLS11 Protection of all land currently designated for allotment use	Periodic Reports to Council & NP Sterring Group on implications for policies being implemented through other Neighbourhood Plans	On going to Feb 2020

**Neighbourhood Plan**

5. Air Quality- RLS 13. New development that generates air pollutants should, by minimising emissions, or by including suitable mitigation, sustain compliance with the air pollutant limits identified for the area (in accordance with European, National or local level standards), including having particular regard to the RLS Air quality Management Area.

6. Traffic & Transport - RLS 14 - Traffic & Transport. Support for measures that reduce reliance on the private car to make Leamington Spa a cleaner, safer and healthier Town. Such measures to include walking, cycling and public transport with suitable provision being made in all new development

Electric Cycle provision to be investigated via Shpmobility Trust
